

My Husband and I are long haul truck drivers and we use XM Radio to keep us informed about weather in the States and city's we travel in. Other radio stations only tell about the towns your in at the time. XM radio lets you hear about weather all over the country, and you never lose the radio signal no mater where you are. XM radio is the best thing that has ever happen for all people, most of all for truck drivers all over the Untied States. And it also helps keep us awake while we drive at night.

Thanks Danny & Cynthia Schexnayder
